SUMMARY

Information Technology undergraduate with a strong foundation in Data Structures, Algorithms, and OOP, and hands-on experience across the MERN stack, REST APIs, and AWS. Built and deployed ML workflows during an AWS AI/ML internship, and applied LLMs (Gemini, RAG) in production-style projects involving policy-driven automation and real-time systems. Comfortable working end-to-end, from AI/backend logic to responsive frontend interfaces.

EDUCATION

Gayatri Vidya Parishad College of Engineering (A)

B.Tech in Information Technology (CGPA: 8.93/10)

Visakhapatnam

Sep 2023 - Present

– Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering

Sasi Educational Institute

Intermediate (MPC) - 97.3%

2021 - 2023

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, C++, JavaScript
- **Core CS:** Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks
- **Generative AI & LLM:** RAG, LangChain, LlamaIndex, Prompt Engineering, Vector DBs (ChromaDB), OpenAI API
- **Backend & Web:** REST APIs, Node.js, Express.js, React.js, HTML, CSS
- **Databases:** MongoDB, MySQL
- **Cloud & Tools:** AWS, Git, GitHub, VS Code, Docker

EXPERIENCE

AWS AI/ML Virtual Internship - EduSkills

Remote

AI/ML Intern

May 2025 - Jul 2025

- Completed a guided program building and deploying machine learning workflows using **AWS SageMaker, Lambda, S3, and API Gateway**.
- Built REST APIs to serve trained ML models, connecting model inference to backend endpoints.
- Worked with a training dataset of over **10,000 records**, handling preprocessing and pipeline setup for model training.
- Collaborated with a **5-member team** following Agile practices, including sprint planning and peer code reviews using Git.

PROJECTS

Smart Blood Bank Management System | GitHub | Live

Vite + React, Node.js, Express, MongoDB, JWT

- Built a full-stack blood bank management platform using **Vite + React, Node.js, Express, and MongoDB** for donor, hospital, laboratory, and inventory management.
- Implemented secure REST APIs with **JWT authentication and role-based access control** for Admin, Hospital, Blood Lab, and Donor operations.
- Developed **blood inventory and emergency request workflows** with blood-group tracking, stock management, and expiration monitoring.
- Automated donor eligibility using a **90-day donation cooldown**, donation history tracking, facility verification, and blood camp management.

AI Career Advisor Web App with Chatbot | GitHub | Live

React, Node.js, Express, MongoDB, WebSockets

- Built a career-guidance chatbot that recommends career paths based on user skills and interests.
- Implemented a real-time chat interface using **WebSockets** so responses stream to the user instead of waiting for a full reply.
- Engineered the recommendation logic mapping user inputs across **3 input categories** (skills, interests, education) to suggested career paths, stored and served via MongoDB.
- Structured the backend as a **3-layer architecture** (routes, controllers, services) to keep the codebase maintainable as features were added.

ACHIEVEMENTS

- Certified in **Microsoft SQL AI Developer Associate (DP-800)**, **Microsoft Fabric Data Engineer Associate (DP-700)**, **Microsoft Fabric Analytics Engineer Associate (DP-600)**, AWS Cloud Foundations, AWS Machine Learning Foundations, Oracle AI Cloud Database Services Certified Professional, and Oracle Generative AI Professional.
